

MESSAGE FROM THE PRESIDENT/CEO

Co-ops and the local communities they serve

We like the word “local.” We like it because it’s the nearby hardware store where we can get what we need. It’s where we meet friends for coffee. It’s the shop where they look us in the eye and smile. It’s a word of warmth that makes us feel known.

“Local” also means your electric cooperative. Holmes-Wayne Electric Cooperative is as local as you and your neighbors because you own the co-op. You are the member-owners.

We’ve grown and changed with you, possibly starting before you were even born. Because the co-op is made up of you and your neighbors, we’re as unique as you are, and we change and adapt to support current needs in our community. October is National Co-op Month, a time when we recognize and celebrate the advantages of being local.

No such thing as a typical co-op

In the 1930s, only 140 farms in Holmes County had electricity. Local farmers, the Holmes County Extension office, and the Ohio Farm Bureau organized a member-owned, not-for-profit electric cooperative. On Oct. 31, 1935, Holmes Rural Electric Cooperative, Inc. was established. A year later, in 1936, members of the Wayne County community working on rural electrification joined in the project, adding 254 members.

We are an integral part of our local communities, but we’re also a part of a larger community of cooperatives across the nation. Today, 900 electric co-ops provide electricity to more than 20 million businesses, homes, schools, and farms.

Because electric co-ops are so uniquely local, it’s hard to describe a typical co-op. They’re big and small. The largest electric co-op serves nearly 350,000 members; the smallest, 113. Holmes-Wayne Electric serves over

12,500 members, with 18,000 metered services.

Co-ops are found in metropolitan and nonmetropolitan areas.

While the electric co-op rural heritage meant they once didn’t serve cities, many of their communities have grown over the decades. Now about 40% serve counties classified as rural and 60% serve counties classified

as metropolitan. Another way to look at that variety is by the average number of members served by each mile of its power lines. The co-op with the densest population serves 78 meters for each mile of line. The most remote co-op averages less than one service per mile of line. Holmes-Wayne Electric serves 7.6 meters per mile of line. While those numbers reflect the variety and uniqueness of who co-ops serve, we also work together.

Less pollution

As co-op members became more aware of environmental priorities, co-ops focused on reducing power plant emissions. Ohio’s electric cooperatives have invested \$1.2 billion in environmental controls. From 2008 to 2019, SO₂ (sulfur dioxide) emissions decreased 71% and NO_x (nitrogen oxide) decreased 77%.

The world keeps changing, and electric co-ops will continue to adapt. Each co-op’s approach may differ, but we all do whatever it takes to adapt in ways that make the most sense for the people in our communities. That’s what it means to be a local electric co-op.

Glenn W. Miller
PRESIDENT/CEO

Who **POWERS** you?

Inspired by someone making a difference in your community? Tell their story and they could win a cash prize.

Visit whopowersyou.com between 9/8/20 and 10/9/20 and submit a photo of your nominee. Then tell us why that person inspires you and how they make a difference in your co-op community. The 2017 second-place winner was the Lord's Pantry in West Salem, Ohio.

\$5,000 GRAND PRIZE

\$2,000 SECOND PLACE

\$1,500 THIRD PLACE

\$500 HONORABLE MENTION

**TOGETHER, LET'S
CELEBRATE THE POWER
OF HUMAN CONNECTIONS**

As the national network of more than 700 co-ops, Touchstone Energy Cooperatives value the people who elevate and energize our communities. That's why we're excited to announce the fifth annual rendition of the very popular #WhoPowersYou contest to honor inspirational community members across the country. Winners will be selected by a panel of judges based on the impact they have on the community. All entries must be submitted by October 9, 2020.

Visit whopowersyou.com for full contest rules

CAPITAL CREDITS

I GET **CASH** FROM MY ELECTRIC COMPANY?!

As a member-owner of your electric cooperative, you receive capital credits.

In the past 10 years, Holmes-Wayne Electric has distributed more than

\$12.9 MILLION

in capital credits to its members.

What are capital credits?

Capital credits distributions from member-owned, not-for-profit utilities like Holmes-Wayne Electric Cooperative are somewhat similar to the dividends paid to shareholders of investor-owned utilities. The difference is that a co-op's "shareholders" are also the members that it serves, and the "dividends" are capital credits distributed to the cooperative's member-owners.

What's the difference between allocated and retired capital credits?

Allocated capital credits appear as an entry on the permanent financial records and reflect your equity, or ownership, in HWEC. Every year, the cooperative notifies its member-owners of the amount added to their patronage capital account through a printed notice on their May electric bills. When capital credits are retired, a check is issued to you.

How are capital credits calculated?

Each year, net margins of the cooperative are divided among the members based on each member's electric consumption for the year. Members who use more electric service receive a larger amount of capital credits allocated to their account.

Will I receive a capital credits check every year?

The board of trustees must authorize a retirement before you receive a check. When considering a retirement, the cooperative's board of trustees must

consider the financial condition of the cooperative, the need for cash, and the availability of loan funds.

What happens to my capital credits when I leave HWEC's service area?

Your capital credits remain on the books in your name and member number until they are retired. Because payments are made to current and former members alike, you should ensure that HWEC always has your current mailing address.

I have been a cooperative member for several years. When will I receive a capital credits check?

Most recently, the HWEC Board of Trustees approved the retirement of capital credits from 1999–2000. Members who joined the cooperative since 1999–2000 have not yet received a general capital credits retirement. The unretired capital credits, or "equity" of the cooperative, serves a vital function — allowing the cooperative to operate economically and effectively, while investing in the infrastructure necessary to meet the needs of our members. A 20-year capital patronage cycle is the common industry standard.

What are unclaimed capital credits?

HWEC wants to ensure that members receive this benefit, but sometimes we are not able to reach members after they have moved from our lines, leaving their capital credits "unclaimed." In this month's and November's issue of *Ohio Cooperative Living*, we have included a list of members who have not claimed their capital credits. If you recognize any of the names listed, please have the person contact our office toll-free at 866-674-1055.

HWEC also needs to be notified by a relative or other legal representative when a member passes away so that the account can be closed or transferred to another person's name.

Unclaimed capital credits

In 2016, Holmes-Wayne Electric Cooperative, Inc. mailed a general retirement of capital credits. Many checks were returned to us as undeliverable and, to date, these refunds remain unclaimed. Per the cooperative's Code of Regulations, the unclaimed capital credits are reallocated to current cooperative members four years following the original mailing and following two consecutive notices in this publication. This is the first notice. Anyone with information on these members or their heirs whose name and last known residence is listed is asked to contact the cooperative office toll-free at 866-674-1055. Contact must be made by Jan. 1, 2021, 60 days following the last date of the publication of this notice.

Ward off energy waste

Did you know that electric devices can continue to use energy even when not in use? When equipment is plugged in and left idle, power is drawn from the outlets. This leads to increasing energy waste and spiked utility bills. This energy waste is also referred to as “phantom” or “vampire” energy.

Standby power is used when an electronic device is consuming energy aside from performing its main function. Common phantom power culprits include computers, battery chargers, DVD players, and treadmills. Standby power accounts for between 3–10% of energy costs.

Use these tips to avoid standby power loss:

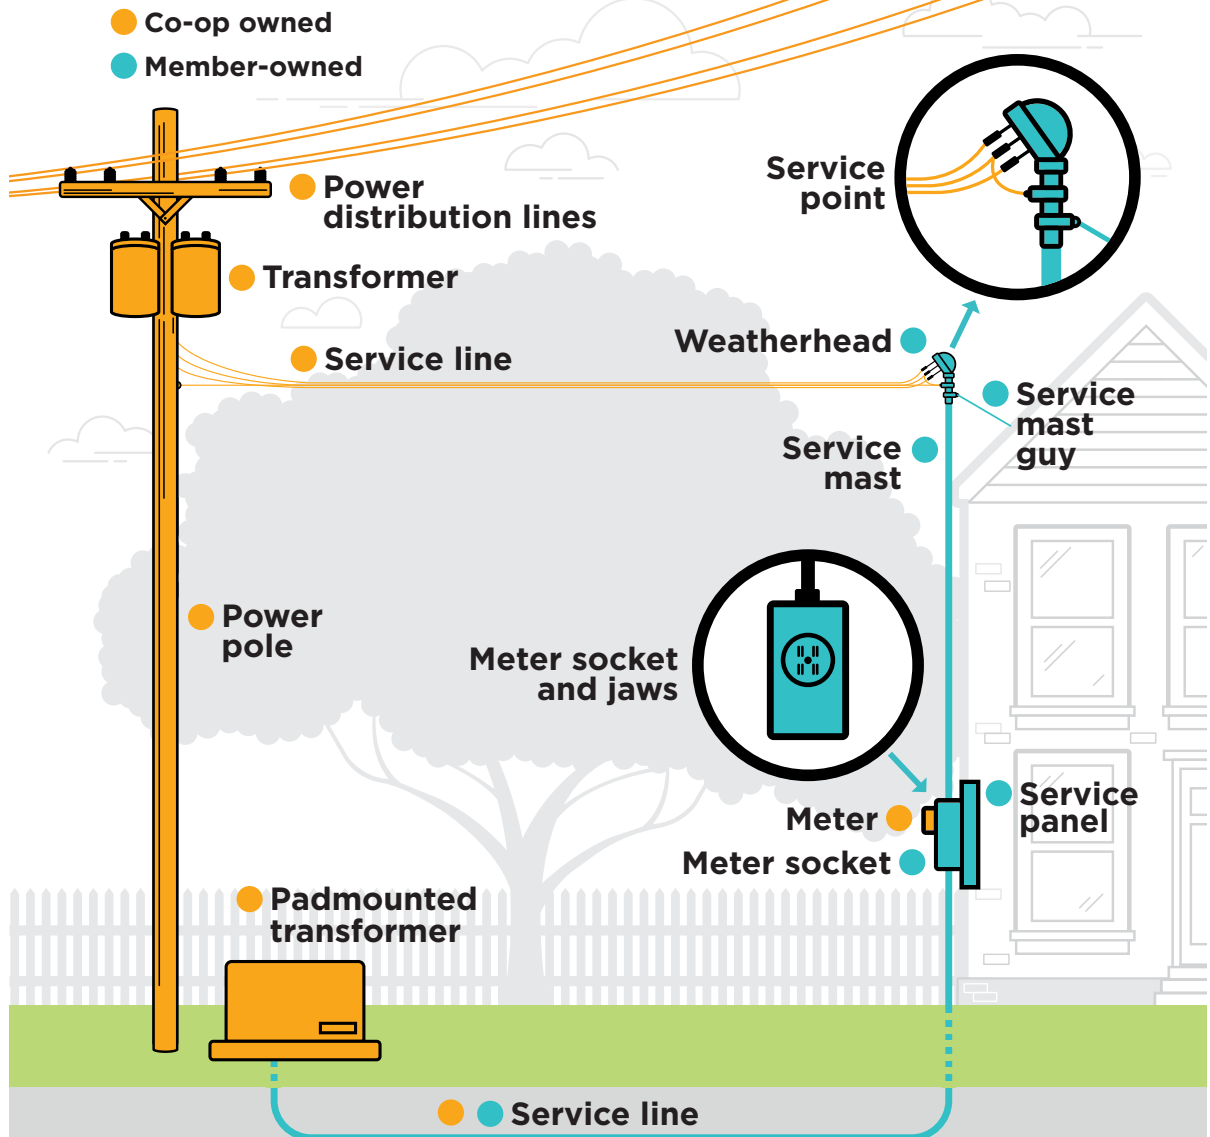

- When possible, unplug all electronics that are not in use, especially those that you do not use often.
- Consider powering down devices rather than leaving them on standby mode for extended periods.
- Power strips can aid efficiency as they can turn off all devices that are plugged in with flip of a switch.
- Smart power strips use advanced technology to turn off the power from idle electronics automatically.
- When shopping for new electronics, invest in ENERGY-STAR products, which have a lower standby rate of energy consumption.
- By using an electronic timer, you can reduce the standby load on items used only in select periods of the day, such as coffeepots.

Who Owns What?

Electric Co-op Owned Equipment vs Member-Owned Equipment

This graphic depicts equipment owned by the co-op (in gold) and the member (in blue). If a storm damages any equipment owned by the co-op, we are responsible for repairs. If a storm damages any member-owned equipment, the member is responsible for repairs. Members should hire a licensed electrician when making any repairs to member-owned equipment.

Note: This graphic depicts overhead and underground service. Underground service requires the resident to provide ditch and conduit. HWEC provides wire.

COMMON UTILITY SCAMS!!

Scammers call and threaten service disconnection,
demanding immediate payment.
When in doubt, call us toll-free 866-674-1055.
